DETAILED ACTION

Claims 9-10, 29-30, 42-43 are canceled.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8, 12-28, 32-41, 44-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over PGPUB - US 2002/0016759 to Macready et al (hereinafter Macready) in view of US 6,401,080 to Johnson et al (hereinafter Johnson) and US 6,338,050 to Conklin et al. (hereinafter Conklin).

Re. Claim 1, Macready discloses a system, method and apparatus, storing one or more rules identifying strategic selling policies (preferences) in a storage device in the computer system and storing attributes for the product or service to be sold in a storage device in the computer system [Abstract; Figure 3; paragraphs (para.) 0002 (seller capability), 0009 (decision), 0017 (attributes), 0056, 0125: 0142; 0211; 0157, 0278-0281, 0297; 0303],

automatically determining an initial offer of sale for the product or service, automatically providing the initial offer of sale to a customer, and obtaining history information regarding the product or services, and determining acceptable terms of sale

Art Unit: 3693

based on the history information [page 26 claim 109; para. 0003; 0048; 0211; 0278; 0360 (see bad past experience)].

Macready does not explicitly disclose automatically negotiating, by negotiating engine in the computer system, terms of sale the product or service based on initial offer of sale, the one or more rules, and the one or more attributes of the product or service, and receiving a modification, which was made by the customer, to the terms of sale, and the negotiating engine automatically negotiates by determining and providing a counteroffer to each modification of the terms of sale made by the customer until the customer and the negotiating engine agree to mutually acceptable terms of sale. However, Johnson discloses automatically negotiating, by negotiating engine in the computer system, terms of sale the product or service based on initial offer of sale, the one or more rules, and the one or more attributes of the product or service [C1 L44-L58; C4 L66-L67; c6 L17-L22, L57-L64; C14 L10-L25 – see moderator = automatic negotiator] to obtain wholesale price with best economic value by automatic auction system. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the disclosure of Macready and include automatically negotiating, by negotiating engine in the computer system, terms of sale the product or service based on initial offer of sale, the acceptable terms of sale based on the history information, the one or more rules, and the one or more attributes of the product or service, as disclosed by Johnson, to provide an electronic auction system with negotiation engine to obtain best price for the product. Conklin discloses receiving a modification, which was made by the customer, to the terms of sale, and negotiating

Art Unit: 3693

engine automatically negotiates by determining and providing a counteroffer to each modification of the terms of sale made by the customer until the customer and the negotiating engine agree to mutually acceptable terms of sale [Abstract; col. 12 lines 28-45; col. 14 lines 1-40; col. 19 lines 28-37 and claim 21] to provide a system and method for iterative bargaining and purchasing over a network which enabled the buyer to negotiate the terms and conditions iteratively until the sale agreement is reached. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the disclosure of Macready and Johnson and include receiving a modification, which was made by the customer, to the terms of sale, and negotiating engine automatically negotiates by determining and providing a counteroffer to each modification of the terms of sale made by the customer until the customer and the negotiating engine agree to mutually acceptable terms of sale, as disclosed by Conklin, to provide negotiation system to enable the seller to submit counteroffer to buyer until the sale is concluded.

Re. Claim 2, Macready discloses wherein the *one or more* rules include *one or more* rules directed to at least *one of* an identification of the types of products or services that are to be sold over a specified period of time, preferred terms and conditions of sale, preferred shipping or delivery policies (variation in *delivery* time as a function of *price*) [paragraph 0034].

Re. Claim 3, Macready discloses wherein the one or more attributes includes at least

Art Unit: 3693

one of a minimum price to be paid for the product or service, a minimum number of products or services for purchase, sets of products or services that may be offered as substitutes for each other, information about relative valuations or tradeoffs among products or services, information for determining tradeoffs among imperfectly substitutable products or services, information for determining tradeoffs between product or service prices, order size, and delivery times, information for determining tradeoffs between product or service prices and vendor preferences, thresholds for minimum acceptable quality measures [paragraph 0014, 0306].

Re. Claims 4-8, Macready discloses 4. The *method* of claim 1, wherein the product or service is associated with a multi-attribute utility function that describes an interrelation between multiple attributes of the *one or more* attributes, wherein the *one or more* attributes are dynamically set (price), wherein the *one or more* attributes are fixed (colors), wherein at least *one of* the *one or more* attributes is dynamically set and at least *one of* the *one or more* attributes is fixed, and wherein a value of at least *one of* the *one or more* attributes is automatically set (price quote) [paragraph 0007,0014-0017].

Re. Claims 12-13, Macready discloses wherein automatically negotiating terms of sale of the product or service includes obtaining exogenous preference information for a customer, and determining acceptable terms of sale based on the exogenous preference information (different utility), wherein the exogenous preference information

Art Unit: 3693

includes at least one of identification of known (preferred color). or previous customers

that are preferred, identification of known or previous customers that are to be avoided,

rank ordering of customers, and rank ordering of customers to prefer for the product or

service [paragraph 0016].

Re. Claim 14, Macready discloses wherein automatically negotiating terms of sale of the

product or service includes obtaining information about one of the product or service

and the customer from a third party and determining acceptable terms of sale based on

the obtained information [paragraph 0036, 0138].

Re. Claim 15, Macready discloses wherein negotiating terms of sale of the product or

service includes at least one of using a price setting method, using an automated

bidding method, and haggling over terms of sale of the product or service [paragraph

0006].

Re. Claim 16, Macready discloses wherein negotiating terms of sale of the product or

service includes negotiating based on one or more negotiation parameters including at

least one of thresholds on minimum acceptable price (whether or not he wants to be

above or below that threshold) [paragraph 0306, 0142].

Re. Claim 17, Macready discloses further comprising storing a record of the sale

[paragraph 0142].

Art Unit: 3693

Re. Claim 18, Macready discloses wherein automatically providing the initial offer of sale to the customer includes updating an on-line catalog listing for the product or service based on the initial offer of sale [paragraph 0007, 0279].

Re. Claim 19, Macready discloses wherein automatically providing the initial offer of sale to the customer includes transmitting the initial offer of sale to the customer prior to the customer requesting the initial offer of sale for the product or service (online catalog) [paragraph 0008, 0279, 0312].

Re. Claim 20, Macready 20. The *method* of claim 1, wherein the *method* is implemented in a distributed data processing *system* (internet and coupled to the economic hub serves) [paragraph 0295-0297, 0303].

Re. Claim 21, system claim 21 is rejected with same rational as claim 1, system of Macready includes a computer readable medium capable of storing computer instructions of method claimed.

Re. Claim 22, system claim 22 is rejected with same rational as claim 2.

Re. Claim 23, system claim 23 is rejected with same rational as claim 3.

Re. Claim 24, system claim 24 is rejected with same rational as claim 4.

Re. Claim 25, system claim 25 is rejected with same rational as claim 5.

Re. Claim 26, system claim 26 is rejected with same rational as claim 6.

Art Unit: 3693

Re. Claim 27, system claim 27 is rejected with same rational as claim 7.

Re. Claim 28, system claim 28 is rejected with same rational as claim 8.

Re. Claim 32, system claim 32 is rejected with same rational as claim 12.

Re. Claim 33, system claim 33 is rejected with same rational as claim 13.

Re. Claim 34, system claim 34 is rejected with same rational as claim 14.

Re. Claim 35, system claim 35 is rejected with same rational as claim 15.

Re. Claim 36, system claim 36 is rejected with same rational as claim 16.

Re. Claim 37, system claim 37 is rejected with same rational as claim 17.

Re. Claim 38, system claim 38 is rejected with same rational as claim 18.

Re. Claim 39, system claim 38 is rejected with same rational as claim 19.

Re. Claim 40, system claim 40 is rejected with same rational as claim 20.

Re. Claim 41, apparatus claim 41 is rejected with same rational as claim 1.

Re. Claim 44, apparatus claim 44 is rejected with same rational as claim 12

Re. Claim 45, apparatus claim 45 is rejected with same rational as claim 14.

Re. Claim 46, apparatus claim 46 is rejected with same rational as claim 15.

Re. Claim 47, apparatus claim 47 is rejected with same rational as claim 17.

Re. Claim 48, apparatus claim 48 is rejected with same rational as claim 18.

Re. Claim 49, apparatus claim 49 is rejected with same rational as claim 18.

Claims 11 and 31 are under 35 U.S.C. 103(a) as being unpatentable over Macready in view of Johnson and Conklin, as applied claim 1 and claim 21 above, further in view of Kansal (US 6,647,374).

Application/Control Number: 09/915,986 Page 9

Art Unit: 3693

Re. Claim 11, Macready or Johnson does not explicitly disclose wherein the history information includes at least *one of* production costs for the product or service, prices of similar or competing products or services, current or past sales and income on different products or services, estimates of historical measures of customer demand for the product or service, and customer click stream history. However, Kansal discloses these features [Abstract; C2 L19-L40; C3 L39-L67; C4 L12-L16] to evaluate the reliability, performance and probability of vendor's default for delivery of a product. It would have been obvious to one of ordinary skill in the art at the time the Applicant's invention was made to combine disclosures Macready, Johnson, Conklin and Kansal to provide vendor's historical reliability with respect to other vendors to determine appropriate vendor.

Re. Claim 31, system claim 31 is rejected with same rational as claim 11.

Response to Arguments

2. Applicant's arguments with respect to pending claims have been considered but are most in view of the new ground(s) of rejection.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Application/Control Number: 09/915,986 Page 10

Art Unit: 3693

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harish T. Dass whose telephone number is 571-272-6793. The examiner can normally be reached on 8:00 AM to 4:50 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James P. Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
